

# NOURELDIN MOHAMED YEHIA

## Developed Products List - Bulk Editor Plugin

☎ 01020007093   @ nouradawy@hotmail.com   🔗 <https://linkedin.com/in/nouradawy>   📍 Egypt - Giza - Elshakh zayed

### EXPERIENCE

#### Design, build and maintain Phone Dialer App

📅 11/2021 - 01/2022   📍 Location

- Design, build and maintain high performance, reusable reliable code including UI and core functionality
- Managed 1,000+ contacts using Flutter application.
- Implementation for a Call Reason that can be filled by the caller visible to the Call Receiver to determine whether to accept the call or not
- Applied Facebook friend list pictures to contacts.
- Centralized all messaging by integrating Facebook, WhatsApp, Twitter in contact details.
- Enhanced user experience by customizing call screen backgrounds.

#### Developed Products List - Bulk Editor Plugin

📅 11/2022 - 12/2022   📍 Location

- Increased client productivity by 25% through enhanced plugin features, boosting sales efficiency.
- Improved data management capacities by 40%, resulting in faster project completion times.
- Implemented 100+ customization options for bulk editing, handling diverse client requirements.
- Achieved a 30% reduction in user errors by streamlining editing processes through intuitive design.
- Enhanced product list accuracy by 15% by developing advanced filtering capabilities.

#### Fullstack Developer

📅 03/2023   📍 Location

- Designed and developed a full-stack web application for Medicare, a medical services platform, using React for the front-end and Spring Boot for building scalable and secure RESTful APIs.
- Implemented a MySQL relational database with optimized schema design and indexing for efficient data access and storage.
- Built interactive UI components with React, ensuring responsive design and seamless user experience across devices. Developed robust backend services with Spring Boot, handling user authentication, appointment scheduling, and role-based access control.
- Integrated third-party services and libraries for enhanced functionality such as notifications, secure login, and form validation.
- Deployed the application to a cloud environment with a focus on performance, scalability, and uptime.
- Ensured maintainable and high-quality code through modular design, version control, and thorough testing (unit and integration).
- Followed best practices in software design, application security, and REST API standards throughout the development lifecycle.
